Date: Wednesday, May 14, 2014 10:30:14 AM

Denise, there isn't anything wrong with the one you did! The list of Chemicals is a bit overwhelming, so I would like to use Brenda's suggestion. Sorry to delay you, I just want everyone to be happy with our final product.

Thank you very much,
Bill

Thanks, Brenda. I was just following the "format" from other proposed sites. This sounds good to me.

Bill, your call...let me know what you want and I will forward.

Here is my take if you want it to be more informative-less list of chemical compounds. -

Delta Shipyard was a cleaning and repair facility for small cargo boats, fishing boats, and oil barges located in Houma, Louisiana. Oily waste from the cleaning process was stored in several unlined

earthen pits used as evaporation ponds. Large volumes of waste remain on site, and hazardous substances have been found in ground water, surface water and soil. Wetlands surrounding the Site are contaminated with metals and poly aromatic hydrocarbons. Without remediation of the site, additional releases to ground water, surface water and soil will continue to occur

Subject: FW: Formatted public notice for Delta Shipyard--Proposed NPL (Comments due by NOON, TODAY, MAY 14)

Importance: High

Brenda.

Attached is the Public Notice, Please look at this and let me know if it is OK or if it has too much detail on the contaminants. We are late with it so please let me know as soon as you can.

Thank you,

Bill

Subject: Formatted public notice for Delta Shipyard--Proposed NPL

Denise:

We received the work order for Delta Shipyard. Attached is a formatted public notice for Delta Shipyard. I confirmed the site name in CERCLIS, and added a sentence with the site location.

Please let us know when you consider it final and ready to place in the newspaper.
